INTRODUCTION TO THE MAJOR

Data science combines computational and inferential reasoning to draw conclusions based on data about some aspect of the real world. Data scientists come from all walks of life, all areas of study, and all backgrounds. They share an appreciation for the practical use of mathematical and scientific thinking and the power of computing to understand and solve problems for business, research, and societal impact.

The Division offers a major and minor in Data Science, as well as coursework such as Data 8: Foundations of Data Science, its connector courses, and Data Science modules that are broadly accessible to all students.

AMPLIFY YOUR MAJOR

These opportunities are open to all students:

- Help shape the Data Science program as part of a student team working on data analytics, curriculum development, communications, human resources, etc.
- Apply to be a data peer consultant.
- Make an impact with cutting-edge research and gain hands-on skills with the Data Science Discovery Research Program.
- Join a student organization such as those in the Data Science Nexus.

THE DATA SCIENCE CURRICULUM

Students will gain deep technical knowledge and an understanding of the social and human contexts and ethical implications of how data are collected, analyzed and used. Students also gain expertise in applying knowledge in a chosen Domain Emphasis; a few examples include:

- Cognition
- Computational Biology
- Geospatial Information & Technology
- Human Behavior & Psychology
- Inequalities in Society
- Social Policy and Law

I think that the broadest possible set of people in the world need to be owners of the data.

– Statistics Professor Ani Adhikari, Co-Creator of Data 8
### Data Science Bachelor of Arts

**Design Your Journey**

<th><strong>First Year</strong></th>
<th><strong>Second Year</strong></th>
<th><strong>Third Year</strong></th>
<th><strong>Fourth Year</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Explore your major</strong></td>
<td><strong>Connect and build community</strong></td>
<td><strong>Discover your passions</strong></td>
<td><strong>Engage locally and globally</strong></td>
</tr>
<tr>
<td>Review major and college requirements. Meet with a Data Science major advisor and your college advisor to create a 4-year schedule. Talk to Data Science peer advisors about life in the major. Join or form a study group. Take Data 8.</td>
<td>Get in mentoring with Berkeley Connect and L&amp;S Mentors Program. Find academic support at the Student Learning Center and other tutoring resources. Check out Data Scholars, a community of underrepresented and nontraditional students in Data Science.</td>
<td>Enroll in a connector course to see how Data 8 concepts apply in a variety of academic areas. Visit the Career Counseling Library to learn more about your academic and professional interests. Discover new interests in a Freshman Seminar, L&amp;S 1, or a student-run DeCal course.</td>
<td>Get involved in Data Scholars or other ways to engage in your classes from the start. Look into volunteer and student organization opportunities across campus. Explore study, internship, and research abroad options with Berkeley Study Abroad.</td>
</tr>
<tr>
<td>Read through the major Domain Emphasis options, noting those that most interest you. Complete lower division prerequisites and declare the major. Review the Data Science Piazza forum. Consider augmenting your major with a certificate or minor.</td>
<td>Join a student organization such as those in the Data Science Nexus. Sign up for the Data Science email list and start attending department events. Engage in public service and leadership experiences by participating in a Public Service Center Program.</td>
<td>Reflect on successes, setbacks, and lessons learned in your first year. Take advantage of the free interactive course textbooks for core Data Science courses. Enroll in a Big Ideas Course or Discovery Course.</td>
<td>Learn about democratizing data science at Data &amp; Tech for All Week. Look into student opportunities to get involved in the Data Science Education Program. Discuss and explore options to study abroad while making degree progress.</td>
</tr>
<tr>
<td>Narrow down your Domain Emphasis preferences and start upper division coursework. Review degree progress with your advisors. Get involved with the Data Science Education Program to develop a portfolio and make an impact on campus.</td>
<td>Help shape the Data Science program by joining a student team, serving as a peer consultant, or becoming a peer advisor. Join a working group to collaborate under the broad rubric of data-intensive social science. Become a Golden Bear Orientation Leader and welcome new students to UC Berkeley.</td>
<td>Explore team-based, data research projects in the Data Science Discovery Program. Pursue independent projects with help from the Data Peer Consultants or D-Lab workshops. Consider applying to the Data Science Honors Program or writing a senior thesis.</td>
<td>Experience life outside of Berkeley via campus visitor and exchange programs, UCDC, Cal in the Capital, or the Cal-in-Sacramento Fellowship. Attend conferences or get involved in Data Science-related projects to supplement your curriculum.</td>
</tr>
<tr>
<td>Do a degree check to ensure you are on track to graduate. Complete any &quot;bucket list&quot; courses. Finish remaining major, college, and campus requirements.</td>
<td>Join a professional organization related to your interests. Volunteer and give back to the community. Attend a variety of performances, events, and activities to expand your mind. Connect with alumni groups and build your network as you prepare to graduate.</td>
<td>Attend lectures and speaker series hosted by the Berkeley Institute for Data Science (BIDS) or other related research units. Take on a leadership role in a student organization. Find research and funding opportunities in the OURS database.</td>
<td>Consider gap year opportunities prior to embarking on your next academic or career adventure. Explore service opportunities after graduation, such as Peace Corps, Teach for America, or U.S. Department of State.</td>
</tr>
