INTRODUCTION TO THE MAJOR

The French major opens the door to understanding the language and cultural production of France and the French-speaking world. Majors advance their oral and written competency in French through studies of linguistics, translation, film, and literature. Courses in the French department emphasize the ties between language and the arts on the one hand and history, politics, race, and gender on the other. Students of French bring the insights developed through contact with this famously rich culture to a critical appreciation of their own.

WHO STUDIES FRENCH

The French major interests students desiring a general humanistic education based on the language and literature of the French-speaking world; students planning to teach French at the elementary or secondary level; students who intend to pursue graduate work in preparation for teaching and research at the college level; and students preparing for careers in such areas as law, business, or government service, which require both training in a major foreign language and/or a general background in a humanistic discipline.
