INTRODUCTION TO THE MAJOR

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. At Berkeley, our major gives students a foundation in Biological, Clinical, Cognitive, Developmental, and Social-Personality Psychology. The Psychology major fosters methodological, statistical, and critical thinking skills that are relevant to all of these areas.

Whether you are focused on graduate school, making lasting change through social justice, or finding out what makes people tick, there is an opportunity for you with Psychology.
