INTRODUCTION TO THE MAJOR

The Society and Environment major introduces students to the main approaches and theory for environmental social sciences, including how social science tools can be applied to environmental problems, and how social science theories contribute to understanding environmental problems. Society and Environment graduates are well-prepared for careers in fields such as environmental consulting, education, health, or law; community, urban, or regional planning; and other related areas of environmentalism in public agencies, nonprofit conservation organizations, and private companies. Graduates are well-qualified for a variety of graduate programs, including law school, public policy school, and even public health programs.

MAJOR CONCENTRATIONS

Students can select to study Society and Environment through three areas of concentration at the upper division level: (1) US Policy and Management, (2) Global Environmental Politics, or (3) Justice and Sustainability. Students are encouraged to explore one class from each area of concentration before making a final decision for their area of concentration.

AMPLIFY YOUR MAJOR

- Engage with the Berkeley Food Institute, Center for Effective Global Action Center, and Institute for Parks, People, and Biodiversity
- Raise Rausser College awareness with the Student Ambassador Leadership Program and Peer Advisor Leadership Program
- Attend Student Environmental Resource Center meetings to engage with sustainability issues on campus.
SOCIETY AND ENVIRONMENT DESIGN YOUR JOURNEY

Bachelor of Science

**FIRST YEAR**
