SUSTAINABLE ENVIRONMENTAL DESIGN
Bachelor of Arts

INTRODUCTION TO THE MAJOR

The Sustainable Environmental Design major offers students a critical understanding of the sustainability challenges facing urban regions in California and around the globe, and equips students with the technical, analytical, and design tools key to devising creative solutions.

Features of the program include gateway courses on the cultural and scientific bases of sustainability (ED 198-01 & LD ARCH 12); a critical approaches course (ENV DES 102); a methods/technology course (LD ARCH / GEOG C188); upper division courses and concentrations around sustainability; and a capstone workshop (ENV DES 106).

AMILIFY YOUR MAJOR

• Complete a certificate in Design Innovation or Global Urban Humanities.
• Complete a minor in CED or outside of CED.
• Get involved as a CED Admissions Ambassador, Community Fellow, or member of the Undergraduate Student Council.
• Connect with the CED community through student organizations and WursterLife.

“SED students have the exciting opportunity not only to craft their own studies, but to make an impact on future generations of Sustainable Environmental Designers.”
– Kevin Zamzow-Pollock, SED Alumnus

ADMISSION TO THE MAJOR

Students must declare the major at the time of application to the College of Environmental Design (CED). However, current UC Berkeley students may apply to change into CED and declare SED if admission requirements are met and space is available. Transfer applicants must complete two years worth of lower division coursework to be considered for admission to CED.

CED offers a minor in Sustainable Design. The minor is available to CED and non-CED students.
